

Preceptorship for Infectious Diseases Clinic at the San Martino Hospital in Collaboration with Academy srl (CME Provider) supported by a grant from Pfizer Global Medical Grants

Request for Applications (RFA) Gram negative Infections: from Laboratory to Patient's bedside (Kill Bad Bugs 4.0 2020)

San Martino Hospital in collaboration with Academy srl (CME provider) is pleased to offer two (2) five day training sessions, held at the Infectious Diseases Department, San Martino Hospital, Genova during the calendar year 2020. These in-depth, hands-on training sessions for doctors in Europe who are responsible for the care of infectious disease patients (specifically those with gram negative infections) at their home institutions have been developed by faculty at the San Martino Hospital in collaboration with Academy srl, independent of Pfizer. Pfizer is supporting the program via an educational grant and will cover travel and accommodation/some sustenance expenses for selected trainees via the educational grant (please note that the cost of all food and beverage and other sundry items will **not** be covered and no funds will be paid directly to attendees).

Training will consist of clinical observation, one-on-one faculty instruction and didactic learning modalities to increase the knowledge and competency with all aspects of the management of patients including with gram negative infections: epidemiology, rapid microbiological testing, mechanisms of resistance, antimicrobial stewardship, old and new therapies, pneumonia, sepsis and management of gram-negative infections in immunocompromised patients.

Interested trainees should submit a qualification worksheet application (attached) and a current Curriculum Vitae (CV) to the following email address: emanuela.ferrari@academy-congressi.it. Please note you must acknowledge your availability for one or more sessions, and you must currently practice medicine in one of the target geographies.

The San Martino Hospital and Academy srl will evaluate all applications and will make all final selection decisions. If you are accepted into the first session, you will be notified by 10th January 2020. Information on travel arrangements and visa requirements will be provided at a later date.

Date RFA Issued:	5 th December 2019
Clinical Area:	Infectious Diseases (specifically gram-negative infections)
Application due date:	31 st December 2019
